SAGE & OATS: AMERICAN INDIAN ENTREPRENEURSHIP

Major and Michelle Robinson, dreamed of creating a space that embodied their cultural heritage. Major is an enrolled member of the Northern Cheyenne Tribe and Michelle is Scotch Irish. Their dream to create a business that showcased both their backgrounds came to light in their retail shop, Sage and Oats, located in downtown Helena. The business offers items made by local craftspeople, focusing on Native American art and gifts. The Robinson's pride themselves on being able to share the work of artists with tourists, hoping to inspire others on the beauty

that Montana's Indian Country holds. The business' exterior remodel was partially funded by the Montana Business Improvement District which aims to improve property value and increase tourism rates through advocating and supporting communities.

Major was also a recipient of the Indian Equity Fund, which he matched with his own savings to qualify. The programs offered from the Montana Department of Commerce was created for small businesses like Sage and Oats. The funding is set to allow applicants to apply for up to

\$14,000 in matched funds. As agencies continue to promote Indian entrepreneurship, success stories like Major and Michelle Robinson continue to showcase the opportunity available in Montana to start or expand a business.

Major Robinson has long been regarded as an advocate for Indian Country, serving as Interim Director of the Governor's Office of Indian Affairs during Governor Brian Schweitzer's administration, then working in economic development. Robinson was a key founder in forming the Montana Indian Business Alliance, a non-profit working to positively impact disadvantaged Montana Native American Communities.

"Take that step, even if that means doing business out of your garage. I really, really believe in entrepreneurship, especially American Indian entrepreneurship. I really believe and hope this encourages other tribal members to invest in their dreams."

– Major Robinson, Helena IR

ADVANCING ECONOMIC SUCCESS IN INDIAN COUNTRY

This year the Montana Department of Commerce announced a new tourism campaign geared toward showcasing Montana's Indian country. According to a national study commissioned by the Department of Commerce, 82 percent of leisure travelers expressed interest in exploring sites and experiences related to Native American culture and history. The new advertisements will be placed in National Geographic reaching an audience of 24 Million visitors per month.

"The rich culture and history of tribal nations is an integral part of the Montana experience. Marketing campaigns such as this will encourage visitors to bring the positive economic impacts of tourism into tribal communities and reservations."

– Former Montana Department of Commerce Director Pam Haxby-Cote

Crow Fair Centennial

50,000 spectators joined the Crow Nation for the 100th annual Crow Fair Celebration Powwow and Rodeo. The long weekend of festivities included parades, a multi-day powwow, horse racing, Indian Relay, and a rodeo.

Tourism is a robust economic engine in Indian Country and traditional powwows brings visitors from all over the world to take part in the celebration.

"We hold this celebration every year to celebrate life and showcase Apsáalooke culture. But, it's not about showing off; it's a way of showing who we are and how far we've come together to maintain our dignity and our identity. We thank the Department of Commerce for their partnership with the Crow Tribe in sharing this unique experience with the world."

- Crow Tribe Secretary R. Knute Old Crow

SUPPORTING SMALL BUSINESS DEVELOPMENT

Native American Business Advisors (NABAs) Grant

The Native American Business Advisors (NABAs) Grant is a fund to support the activities of Native American community-based organizations, tribal colleges, and tribal government organizations that support private sector business development on reservations and in tribal

communities. These entities offer business counseling, credit counseling, and application support to Native American businesses in Montana.

The NABAs are a key community asset necessary in the development and success of Native American businesses. To develop this asset, the Program is focused on increasing the technical capacity of the NABA network such as assisting individuals in business start-up, marketing, utilization of business resources, and commercial loan application assistance. Additionally, NABAs will also provide more robust application assistance to the Indian Equity Fund Small Business Grant applicants. A total of \$15,000 per application was available to fund up to eight NABA applications in each of tribal nation areas.

Montana State Small Business Credit Initiative (SSBCI) Fund

The State-Tribal Economic Development (STED) Commission allocated \$150,000 in Montana State Small Business Credit Initiative (SSBCI) funds to pilot a Montana Indian Youth Small Business Program. Tribal youth interns are placed with private sector entrepreneurs to learn how businesses operate and to assist in growing private sector businesses and business development in Indian Country. The goal of the program is to provide an opportunity for the tribal youth to mentor with small businesses in their interest area that will result in building business acumen, including experience in managing a business, improving communication and customer service skills, and fostering better understanding and deeper appreciation of success in tribal small business. Additionally, the program intends to leverage the unique

perspectives and skills sets of Native youth to grow and diversify operational, marketing and product development for private sector businesses which was identified in the Main Street Montana Project as a critical need in Indian Country. Ultimately, Native youth and private sector businesses will be positively impacted, and the tribal private sector economy will be enhanced. The program is currently ongoing with 7 tribal governments participating. Tribal governments fund youth internships via stipend for up to \$2,000 (\$1,500 from the program and \$500 the business). In summer 2017, fourteen youth internships have occurred with additional internships to continue through the summer 2018 and 2019 seasons.

Indian Equity Fund

Montana's Native American business owners can utilize this grant to assist in starting and expanding their business. Recipients can apply the Indian Equity Loan for business activities ranging from land purchase to purchase of assets up to \$14,000. All funds must be matched dollar for dollar or with in-kind contributions.

This program aims to service of Indian Country for success in business and economic development activities, benefiting tribal members, and community growth. The funds are available to enrolled members of Montana's federally recognized tribes and to the enrolled members of the Little Shell Tribe. Applicants must be residents of Montana state. \$318,000 in funding was awarded through the Indian Equity Fund (IEF) Small Business Grant to support the growth of 28 Native American-owned businesses across Montana.

"The businesses receiving these grants represent a cross-section of the increasingly diverse industries driving our reservations and native communities. By supporting Montana's Native American entrepreneurs, the Indian Equity Fund grows prosperity for Indian Country and an even stronger economy for all Montanans."

-Former Montana Department of Commerce Director Pam Haxby-Cote

GRANT RECIPIENTS

Blackfeet Nation

- Carlson Designz in Browning received \$13,000 to purchase an embroidery machine and accessories.
- Johnson's of St. Mary's in Browning received \$9,000 to replace carpet and linoleum flooring.
- Leaning Tree Campground and Cabins in Babb received \$14,000 to construct two new cabins.
- Painted Sky Branding in Heart Butte received \$14,000 to purchase photography, video and web development equipment.
- Red Root Herbs and Divide Creek Campground in Browning received \$14,000 for signage, encampment and water system.

Chippewa Cree Tribe

- HM Salon and Spa, LLC in Havre received \$14,000 to purchase new chairs, equipment and inventory.

Confederated Salish and Kootenai Tribes

- All American Autoworks in St. Ignatius received \$14,000 to purchase automobile detailing equipment and inventory.
- Willow Canyon Professional Counseling Services in Ronan received \$14,000 for training, trailer, fencing and arena construction for equine therapy.

Crow Nation

- Apsaalooke Glamping in Lodge Grass received \$14,000 to purchase tipis, a generator and a computer.
- Crow Country Guides and Outfitters in Hardin received \$14,000 to purchase a backcountry vehicle for mountain lion hunting.
- Greasy Mouth Concession and Catering in Crow Agency received \$7,000 to purchase restaurant equipment.
- Meila's Manicures and Makeovers from Busby received \$7,000 to purchase salon equipment.
- Randy Not Afraid Ranch in Lodge Grass received \$7,000 to purchase a tractor.

Fort Belknap Assiniboine and Gros Ventre Tribes

- Archambault Towing in Harlem received \$14,000 to purchase a wrecker tow truck.
- Curly Head Horse Training in Hays received \$14,000 for horse training facility improvements.
- Smoke House Grille in Harlem received \$12,000 to purchase equipment to expand its menu.

Fort Peck Assiniboine and Sioux

- BCS Consulting in Wolf Point received \$7,000 to purchase computers and hardware.
- Gorilla Heating and Air, LLC in Poplar received \$14,000 to purchase and upgrade new facility containers.
- Indigenous Auto LLC in Wolf Point received \$12,000 to purchase a vehicle tow truck.
- Wolf City Auto Inc. in Wolf Point received \$12,000 for upgrades and renovations.

Little Shell Chippewa Tribe

- Great Mountain Creative Ltd Co. in Kalispell received \$14,000 to purchase graphic design equipment.
- Plains Soul in Hardin received \$9,000 for equipment, inventory and marketing.

Northern Cheyenne Tribe

- Dr. "B" ILL'z Repair in Lame Deer received \$14,000 for computer repair equipment, inventory and working capital.
- Ewing Bovine Ultrasound and Artificial Insemination in Lame Deer received \$6,000 to purchase bovine ultrasound equipment.
- Motor Medic in Lame Deer received \$7,000 to remodel its building.
- Phat Gurl Catering in Ashland received \$14,000 to purchase a mobile food cart.
- Small Equine Sports Therapy in Busby received \$7,000 to purchase equine massage equipment.
- Warrior Trail Jewelry and Gifts in Lame Deer received \$7,000 for website and ecommerce development.

Strategic Investment

The Montana Arts Council supports professional development and market expansion through its Strategic Investment Grants program, which provides up to \$1,000 in matching funds to professional artists, nonprofit arts organizations, and preschool – grade 12 teachers in Montana.

In the last year, Palomino Paintings owned by Samantha Jo Bird of Browning received a grant from this program to purchase materials to build a professional exhibition booth for the promotion of her business at art shows and festivals. This investment has allowed her to expand her business' exposure and sales to a wider audience as she begins to travel the art exhibition circuit, including stops in Calgary and Las Vegas.

"I think it is important for people to know that it is never too late to set goals and go after them. No matter your age, where you are from, or what your situation is – you can still become everything you have ever dreamed of being."

-Samantha Jo Bird

INFRASTRUCTURE DEVELOPMENT & PLANNING

MDT ADA Improvements Projects

The Blackfeet Nation applied for a Transportation Alternatives project and was awarded funding in the spring of 2016. The project, currently in design phase, includes a 0.8-mile Americans with Disabilities Act (ADA) compliant shared-use path connecting the community of Heart Butte to the Heart Butte School located 0.3 miles to the south of that community. The project will allow for a safer path to school for pupils and staff. The project required coordination with the Blackfeet Nation Transportation Department and biologist to choose a path alignment with minimal wetland and grizzly bear impacts. A path was chosen that parallels existing roadways to the school, and this alignment was approved by the Blackfeet Nation government. The project is 100% funded using Federal Highway Administration Transportation Alternatives funds.

SECTION I - BETTER JOBS

On March 27, 2018, a Project Specific Agreement between the Montana Department of Transportation and the Confederated Salish and Kootenai Tribes (CSKT) was executed allowing for a Federal Highway Administration Transportation Alternative project along Round Butte Road in and adjacent to the City of Ronan. The project consists of an Americans with Disabilities Act (ADA) compliant sidewalk along Round Butte Road for approximately 0.9-mile from the Ronan Middle School westward to an existing path. No project development activity has occurred in SFY 2018. Total project cost is anticipated to be \$788,876. The project is 100% funded using Federal Highway Administration Transportation Alternatives funding. The Northern Cheyenne Tribe applied for a Transportation Alternatives project and was awarded funding in the spring of 2016. The project includes: a 0.48-mile Americans with Disabilities Act (ADA) compliant multi-use path with pedestrian lighting south of Lame Deer. The project is adjacent to BIA Route 4028 and terminates at the Lame Deer High School. The Confederated Salish and Kootenai Tribe (CSKT) applied for a Transportation Alternatives project and was awarded funding in the spring of 2016. The project

includes: a 700' long, 10' wide Americans with Disabilities Act (ADA) compliant asphalt multi-use path parallel to US Highway 93 and an approximately 40' long; 5' wide concrete sidewalk parallel to Big Knife Lane, crosswalk striping, and signing in Pablo.

The state-tribal activity that has occurred in SFY 2018 included continued communication regarding project development activities. MDT bid the project in April 2018 and awarded the construction contract to Smith Paving & Contracting Enterprises, Inc. Construction was planned to begin on June 11, 2018. The project is 100% funded using Federal Highway Administration Transportation Alternatives funds.

RURAL PARTNERS

Next Steps for the Main Street Montana Project

The Main Street Montana Project was launched in 2013 by Governor Bullock as an unprecedented mechanism in the State to solicit recommendations for governmental changes from the private sector. The goal of the project was, and is to create dynamic private-public partnerships, build and implement a business plan, and provide direction for Montana's economic future based directly on input from Montanans.

Through the Main Street Montana Indian Country process, themes emerged similar to the rest of the state. Participants in surveys, the roundtables and one-on-one conversations focused on the importance of education, the need for a business-friendly climate, ideas for marketing what makes us unique, and a call for innovation and expanding our economy.

The first phase of Main Street Montana Indian Country saw significant success, from establishing a Tribal Apprenticeship Program to creating a Tribal Equity Fund Small Business Grant and the Native American Business Advisors Grant programs. Over 200 recommendations from the work of the first phase have been started or completed.

The next phase of Main Street Montana, Rural Partners, will focus on engaging rural communities, and reengaging with tribal communities. The Initiative will work with tribal communities to bridge resource and capacity gaps, address challenges unique to Indian Country, reduce or eliminate roadblocks to economic success, and connect communities to share opportunities. It will tell the success stories of what rural and tribal communities are already doing to strengthen their economies and communities, so

others can connect, learn, and emulate efforts in their own communities.

Based on what we heard in the first phase of Main Street Montana and priorities identified through the process, we will hold roundtables on all Reservations to reevaluate and reprioritize what came out of the first phase and identify ways the project can assist with current and ongoing efforts. The goal is to provide meaningful assistance to bring economic and community development project(s) to fruition, including Opportunity Zone projects.

MAIN STREET MONTANA- RURAL PARTNERS PRINCIPLES

SUPPORT rural and tribal communities across Montana.

BUILD the capacity of rural and tribal communities to attract new investments, residents and jobs.

STRENGTHEN opportunities in rural and tribal communities, especially for young adults.

DIVERSIFY rural and tribal' economies to improve community resilience.

TOURISM EXPANDS IN INDIAN COUNTRY

Montana's tribal nations have worked incredibly hard during SFY 2019 to revitalize tourism within Indian country. Montana's Department of Commerce amplified their efforts to promote tribal tourism with a new ad campaign targeting out-of-state visitors and encouraging them to experience Montana's Indian Country. The ads are running in the travel section of National Geographic's website and within various printed promotional materials. According to a national survey commissioned by the Montana Department of Commerce, 82% of leisure travelers expressed interest in exploring sites and experiences related to Native American culture and history. Tribal tours and authentic tribal tourism experiences have begun across

Montana, working to share and sustain cultural traditions and values. The Blackfeet Nation has started offering tours of Glacier National Park's Going-to-the-Sun Road and sharing the cultural relevance of the park in Blackfeet Country. This tour gives visitors a unique perspective as guides share their wealth of knowledge and the tribe's history within the landscape, including common plants and roots used for medicine, Blackfoot stories of life in Buffalo days and the history of animal species. The Blackfeet tribe also offer cultural and geographic tours that showcase tribal history and traditions on their ancestral lands. The Kootenai Tribe offers historical tours in Glacier National Park, The Kootenai, Wild Horse Island, Chief Cliff, The Big Draw, and Flathead Lake sharing traditional customs and stories from Kootenai aboriginal territories. The outdoor recreation industry plays a large role in tourism efforts as experience-based tourism continues to expand. Recreators are looking for authentic experiences, and Indian Country offers access to rich culture in stunning areas of the state. As this role in the economy continues to be defined, we are seeing a huge influx in companies within Indian Country who are utilizing recreation opportunities within their marketing efforts to draw in out-of-state tourists.

INCREASING WORKFORCE OPPORTUNITIES

Job Service

Job Service Montana offices service our state's tribal nations through regular outreach to, and by request of, tribal entities. Job Service Montana offices are staffed by Workforce Consultants who assist Montanans in fulfilling their employment training needs, including conducting job search activities, working with business with recruitment and retention of employees, unemployment questions, coordinating local job fairs, and providing training and information on requested issues and topics.

In addition, Job Service Montana staff and leadership, participate in tribal nation events across the state.

The list below shows which Job Service Montana office(s) serving each tribal nation:

- Blackfeet are served by the Job Service Cut Bank and Job Service Great Falls offices
- Crow are served by the Job Service Billings office
- Confederated Salish & Kootenai of the Flathead are served by the Job Service Polson office
- Fort Belknap are served by the Job Service Havre office
- Fort Peck are served by the Job Service Wolf Point office
- Little Shell Chippewa Tribal Capital is served by the Job Service Great Falls office
- Northern Cheyenne are served by the Job Service Billings and Job Service Miles City offices
- Rocky Boy are served by the Job Service Havre office

Jobs for Montana Graduates

The Jobs for Montana's Graduates (JMG) program has been successful in assisting Native American students prepare to graduate from high school and join the workforce, attend college, or serve in the United States Armed Forces.

The ultimate objective of JMG is for students to secure a quality job and/or post-secondary education, or training that will lead to a meaningful career. The program assists students in staying in school through graduation and improve their rate of success by acquiring employability competencies. Students selected for JMG have barriers to success with the completion of high school and/or entry into a job.

Montana Registered Apprenticeship unit (MRA)

The Montana Registered Apprenticeship unit (MRA) continues to grow in Indian Country. The program has partnered with five Montana tribal colleges on a Tribal College Apprenticeship pilot project using US Department of Labor (USDOL) State Apprenticeship Expansion grant funding. The unit collaborated with each of these

colleges to provide financial and technical support to develop apprenticeship programs for tribal businesses. These collaborative opportunities focused on academic programs within the individual colleges.

Participating colleges include: Little Big Horn College, Fort Peck Community College, Aaniiih Nakoda College, Stone Child College, and Salish Kootenai College.

**BETTER
EDUCATION**

Students of all ages, from preschool to higher education, have a fundamental right to a quality education that supports academic growth, positive social development, and career readiness. Since being elected, Governor Bullock has worked with Montana leaders in education to create new avenues that support students on their path toward graduation and a future career. We are pleased to feature in this section the SMART Schools Challenge initiative implemented by the Arlee Eagles Club on the Flathead Indian Reservation and other innovative programs that support student learning and efforts to preserve tribal cultures and languages in our state.

SMART SCHOOLS CHALLENGE

An Environmental Approach to Learning

Since 2015, the Department of Environment Quality has partnered with Montana's K-12 public schools to implement the Save Money and Resources Today (SMART) Schools Challenge initiative. This initiative of Governor Bullock encourages students to conserve energy, recycle waste, and implement environmentally-friendly practices through a competition between schools. Over the last three years, these

activities have helped increase awareness and provide first-hand experiences where students can test their abilities, skills, and interest in environmental studies.

In 2018, the Arlee Eagles Club (Club) on the Flathead Reservation was among thirteen Montana schools to be recognized for the unique characteristics of their SMART School Challenge program implementation.

"Public Education is our nation's great equalizer. Regardless of our background or where we live, our schools open the doors of opportunity for all Montanans. Let's share in the progress of building an even greater Montana than before."

- Governor Steve Bullock

The winners of the competition each received a \$1,000 prize and became a certified Montana SMART School. The Arlee Eagles Club was honored with the Judge's Pick Award for the program's comprehensiveness and ingenuity. The Arlee Eagles Club—which consists of 23 students in the environmental science class and 31 other 9-12 grade students—is leading these efforts through four different groups focused on gardening, recycling, parks and recreation, and a variety of odd jobs to improve their school and community settings.

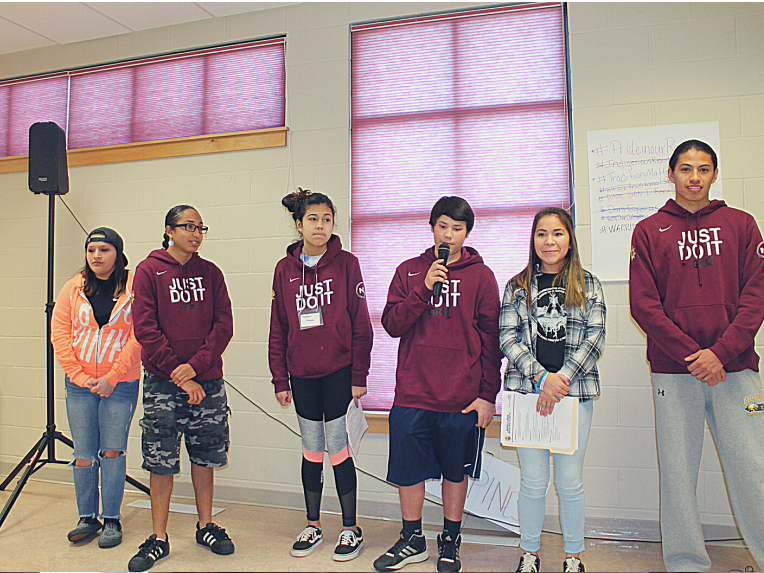

Several SMART School projects in Arlee have been successfully weaved into academic curriculum and after-school events. For example, the gardening group consulted with Salish elders to grow a variety of plants of tribal cultural significance at the school. The classroom garden of fruit and vegetables is used to aid in teaching other students from grades K-6 about proper gardening techniques, the anatomy of plants, and the importance of having a healthy diet. The parks and recreation group has launched "clean up days" to make the school campus and downtown area more presentable by removing graffiti, picking up trash, and trimming bushes.

Students are learning the importance of long-term planning, which is required to acquire the necessary infrastructure and equipment for program implementation.

Efforts are underway to build a new greenhouse to expand gardening operations through the seasonal changes and to promote self-sustainability and healthy living at the school. Students participating in the welding class at the school designed and built a Native dry meat rack for the Indian Club to use during cultural events. Notably, program participants successfully obtained two grants for the purchase of a professional air sensor, which has been installed to scientifically test the playground's air quality that may be impacted by toxic particulates from the coal burning furnace at the school.

In order to reduce waste, the promotion of recycling continues on a daily basis and special events, such as a recycling competition between school buildings that helped yield over 7,500 pounds of recycled materials collected at the school by March of 2018. The Club's environmental science students developed lesson plans to teach every classroom in the school district the importance of recycling. In addition, the group reached out to the Confederated Salish and Kootenai Tribal Climate Change Committee and to spark a local commitment to a more sustainable way of life. These outstanding efforts culminated with a presentation at the Northwest Climate Change Summit in Pablo, followed by an invitation to the Southwest Climate Change Summit in San Diego in California where students had the opportunity to present their work to over 100 professionals. After witnessing such positive impact in the Arlee community and out-of-state, students are excited to serve as environmental advocates for global and local sustainability and hope to inspire other schools in state of Montana and the nation to follow their footsteps.

EARLY LEARNING

STARS TO QUALITY

The Best Beginnings STARS to Quality Program is a voluntary quality rating improvement system that aligns quality indicators with support and incentives for early childhood programs and professionals. In the last year, three child care programs serving tribal communities have participated in STARS to Quality, including the School District #9 Child Care Center in Browning, the Salish Kootenai College Childcare in Pablo, and the Little Raskels Daycare in Harlem. The participating programs are supported through STARS Consultants and Pyramid Model Coaches, as well as incentives to help meet quality indicators and reach a higher STAR level. The DPHHS Early Childhood Services Bureau (ECSB) provides resources and assistance for this program in partnership with the Early Childhood Project and Child Care Resource and Referral Agencies (CCR&R).

Preschool for All

Governor Bullock worked with the 2017 Montana Legislature to secure the state's first-ever investment in publicly-funded high-quality early childhood education with \$6 million over the biennium to expand educational services for Montana's four- and five-year-olds. During the 2017-2018 school year, this funding supported new STARS Preschool classrooms in Pablo, Ronan and Polson, serving more than 50 children.

STARS Preschool builds on the progress made by the federally-funded Montana Preschool Development Grant (MPDG). MPDG is a partnership between the Governor's Office, the Montana DPHHS, and the Office of Public Instruction. In the first two years of the grant, 1,838 children and their families gained access to preschool, ensuring they start kindergarten ready to learn. Last year, 152 educators benefitted from

financial assistance from the grant to pursue higher education and training.

Every tribal Head Start in Montana has become a program grantee. Efforts are implemented on reservations and border towns, where support and transitional services are provided to incorporate cultural activities and Native language into their programming. This last year, an additional \$1.4 million was received from the U.S. Department of Education to increase the quality of preschool programs serving at-risk children in our state, including American Indian children.

“If we take care of our kids and give them high-quality early childhood experiences, we set the stage for their success in school and in life.”

– Governor Bullock

Child Care

The DPHHS Early Childhood Services Bureau has partnered with the Northern Cheyenne Tribal Child Care program and Child Care Resources of Missoula to launch a pilot project that will strengthen online trainings available to tribal child care providers on the Northern Cheyenne Reservation. The project is focused on incorporating tribal cultural components into distance learning courses that will better meet the needs of the Northern Cheyenne tribal community. The process was launched with an existing online health and safety training. The long-term goal is to develop a process that can be replicated with other trainings and other tribal communities to encourage improvements, provide professional development opportunities, and ensure the tribal cultural appropriateness of child care services in reservation areas.

HONORING LEADERS IN EDUCATION

Advocacy Award

The goal of the Indian Education for All (IEFA) is for every Montanan to recognize the unique cultural heritage of American Indians. During the Annual IEFA Best Practices Conference in March 2018, the Office of Public Instruction (OPI) awarded the 2018 Teresa Veltkamp Advocacy Award for Excellence in Indian Education for All to Martha Kohl and Deb Mitchell. These staff members of the Montana Historical Society were honored for having created dozens of workshops and materials in support of IEFA.

Educator of the Year Award

In the spring of 2018, Dr. Sean Falcon Chandler was named the 2018 Montana Indian Education Association Educator of the Year. Dr. Chandler has served as the director of the American Indian Studies Department at Aaniiih Nakoda College (ANC) on the Fort Belknap Indian Reservation for over 15 years. During his tenure, he has expanded the American Indian Studies Department into its own degree program where students can learn about their tribal histories, culture and identities.

As a member of the Aaniinen (Gros Ventre) Tribe, he teaches his Native language to grade-school-aged children at the White Clay Language School and he is committed to the integration of traditional Native cultures in the tribal college's curriculum.

He earned a Bachelor of Arts in Art and a Master of Arts in Native American Studies from Montana State University-Bozeman and acquired a Doctorate of Education in educational leadership from The University of Montana. In addition, Dr. Chandler is a well-recognized artist and a member of the Montana Arts Council.

SHOWCASING ROLE MODELS

ROLE MODELS POSTER SERIES

In 2009, the Office of Public Instruction (OPI) launched a successful poster series featuring positive American Indian role models with various careers and achievements for display at all middle schools and high schools across the state. As role models play an essential part in a child's development, aspirations, and life choices, the posters have become a useful resource to encourage Native students to be constant learners and challenge themselves, and open up a world of possibilities in their lives. Last year, OPI produced a second poster series, titled "Making Montana Proud," which tells the success stories of 14 young and emerging American Indians of Montana. The new poster series was unveiled in March 2018 at the 12th Annual Indian Education for All Conference in Helena. Distribution to Montana middle and high schools began this fall.

ENGAGING YOUTH LEADERSHIP

EMPOWERING YOUNG LEADERS

The Youth Leadership Initiative of the Office of Public Instruction (OPI) prepares students to meet life's challenges and achieve their full potential. Under this initiative, group activities and events organized and led by students provide a positive and collaborative environment to learn communication and organizational skills for effective leadership. In the last year, three regional conferences were organized and led by youth in each region, including "Seventh Generation Leaders: Dignity, Bravery, Identity and Unity" held at MSU-Northern on March 14-16; "Remembering Our Roots in a Good Way" offered at Salish Kootenai

College on March 26-28, and “Connecting Cultures Through YOUNITY” at Browning High School on May 7-8, 2018. These events promoted positive programs and best practices, leadership, networking, and as cultural bridge-building between students from around the state.

Montana Registered Apprenticeship unit (MRA)

The Montana Registered Apprenticeship unit (MRA) continues to grow in Indian Country. The program has partnered with five Montana tribal colleges on a Tribal College Apprenticeship pilot project using US Department of Labor (USDOL) State Apprenticeship Expansion grant funding. The unit collaborated with each of these colleges to provide financial and technical support to develop apprenticeship programs for tribal businesses. These collaborative opportunities focused on academic programs within the individual colleges. Participating colleges include: Little Big Horn College, Fort Peck Community College, Aaniiih Nakoda College, Stone Child College, and Salish Kootenai College.

A New Beginning: Montana Youth Challenge Academy

The Montana Youth Challenge Academy (MYCA) is one of 35 youth challenge programs established in 27 states. MYCA provides a quasi-military environment and framework for at-risk youth, including transfer students and high school students in Montana, to move forward on a path to success as a productive citizen.

In many cases, the MYCA experience is life-changing for the cadets as it brings a new perspective on their life choices and career goals.

In the 2017-2018 school year, twenty-eight Native American youth graduated from the program. Six of them were featured in statewide newspaper articles, which highlighted their personal transformation through their participation in the program: Cadet Hezekiah Follet in the Herald News in Wolf Point; Cadet Coby Rodriguez in the Lake County Leader in Polson; Cadet Emonie Couture in the CharKoosta News in Pablo; Cadet Katelen White in the Glacier Reporter in Browning; Cadet Alexis Flansburg in the Havre Daily News in Havre; and Cadet Samuel Turns Plenty in the Bighorn County News in Hardin. We are pleased to feature some of their accomplishments and personal stories below.

Honor and Service - In the last year, MYCA students had the honor of attending and providing service support to three Native American Pow-Wow events on the college campuses of MSU Bozeman, MSU Billings and the University of Montana in Missoula.

Self-Motivation - Joining MYCA at age 16, Cadet Coby Rodriques became a self-motivator as he needed to keep himself busy to stay out of trouble. An overachiever, he graduated the program with 119 hours when only 40 were required. At graduation, he received numerous awards for his hard work while in the program. Rodriques plans to join the National Guard after graduating from high school.

Heroism - Class 37 Cadet Samuel Turns Plenty struggled in school before entering the program. Once at the academy, he quickly came around and even became the leader of a platoon. In November 2017, he was awarded a MYCA Challenge Coin for administering the Heimlich maneuver and saving the life of a volunteer who was choking on food during a Service to Community project in Helena, Montana.

Turns Plenty plans to graduate from high school and college. He is envisioning a future career in the National Guard or the military.

Perseverance and Discipline - Cadet Alexis Flansburg had a difficult time dealing with authority when she arrived at MYCA, but the program helped her turn a new leaf. She learned discipline, became the leader of her platoon, and earned her nursing assistant certification to support her long-term goal of working in home health care. A talented singer, Flansburg impressed the participants of the 2017 Governor's Tribal Relations Training in Helena where she sang the National Anthem during the opening ceremony.

Outreach - Cadet Coral Sherman joined MYCA in hopes for a change in her own life. She became a good student and displayed natural leadership abilities while in the program. A member of the Confederated Salish Kootenai Tribes, she became the first Native American youth to be featured in a MYCA Public Service Announcement (PSA) last year, which was aired on television stations and radio networks statewide. She graduated from the program in December 2017. Her next goals are to graduate from high school and then attend college to study business and own a business some day.

Leadership - Cadet Hezekiah Follet of the Fort Peck Reservation was the recipient of numerous distinct honors while at MYCA. He became platoon leader early on, received recognition as Cadet of the Month, and attained the rank of senior cadet—the highest rank within the program. Follet also served as a member of the Color Guard, for which he travelled multiple times to bear the colors and represent the academy at special events. On his graduation day, Follet received the Challenge Award for his all-around leadership during his time at MYCA. In his future plans, he wants to obtain his high school diploma and he is considering a military career, possibly in the U.S. Marine Corps.

“It has given me more opportunities in life . . . knowing you’re doing the right thing and not sliding back.”

— Class 37 Cadet Katelen White of the Blackfeet Reservation. She was a squad leader and one of ten cadets selected to attend a vocational week at a nursing home.

EXPLORING NATURE & SCIENCE

Aquatic Education

The Department of Fish, Wildlife and Parks' aquatic education program is collaborating with the Rocky Boy Public School and community volunteers for third grade students to participate in the "Hooked on Fishing" program. Once per month, this program provides class room activities teaching students about fish of Montana, water distribution on earth, Japanese fish art, fish math, fish dissection, and a fish jeopardy game to test their knowledge. In addition, students have the opportunity to engage in fishing outings and open water fishing. This program serves over 40 students per year on the Rocky Boy's Reservation.

Forestry Restoration and Education

In the last year, the Urban & Community Forestry program of the Department of Natural Resources and Conservation received \$185,000 in additional funding from the U.S. Forest Service to expand forestry restoration work with tribal colleges, schools, and other partner organizations. In the last year, the program distributed over 1,500 seedlings and large trees to Native communities. The new funds supported the installment of an interpretive learning area on the Flathead Reservation.

Approximately 800 students benefited from activities, presentations, and summer learning sessions about Native trees, shrubs, and edible plants provided at Polson schools. On the Crow Reservation, over 400 students from schools in Fort Smith, Lodge Grass, Pryor, Wyola, and Morin participated in local forestry restoration events, such as Earth Day and Arbor Day Celebrations.

One of the highlights at Chief Plenty Coup State Park was the planting of a legacy apple tree of historical significance by using cuttings

from old trees planted long ago by Chief Plenty Coups. Tree plantings events were held at Blackfeet Community College and a multifunction shelter-belt was installed, which incorporates medicinal, ceremonial, herbal and edible vegetation.

4-H and STEM Fields

The Children, Youth and Families At-Risk grant is linking youth, adults and communities to agricultural and environmental practices using Science, Technology, Engineering, and Mathematics (STEM) technologies. Over the last four years, approximately 335 Native American students from grades 5-8 have participated in the grant activities on the Crow and Flathead reservations. Students have learned high-level STEM skills, such as building and flying drones, stitching aerial photos together for ground mapping, and using GPS units to locate caches and mark locations where invasive species exist. In addition, students used computer software to design, and ultimately build, a pedestrian bridge. A group of at least seven adults have been trained to use the equipment and

technologies acquired by the schools to continue the STEM activities. This coming year, two students from the Crow Reservation will job-shadow people in tech industries as an introduction to the kinds of jobs that exist in STEM fields.

HIGHER EDUCATION ENDEAVORS

Apprenticeships

In the last year, the state of Montana has partnered with the Northwest Area Foundation to fully fund five qualifying apprenticeship projects at Salish Kootenai College, Stone Child College, Aaniiih Nakoda College, Fort Peck Community College, and Little Big Horn College. These tribal apprenticeships programs have allowed Native American students to complete on-the-job training integrated with existing academic programs that will lead them to careers such as: Certified Nurse Assistant, licensed addiction counselor, HazMat technician, wellness coach, case manager, and behavioral health worker.

Outreach

The MSU Library worked in collaboration with Native American undergraduate students to co-design new outreach tools and create a more welcoming and engaging library for Native American students. This effort generated a seven-part promotional poster series and social media campaign showcasing Native students using the library resources, consulting with library staff, and enjoying the onsite cafe. This effort was supported by the MSU Office of American Indian/Alaska Native Students Success and \$7,220 from the MSU Office of the Provost.

The poster series and social media campaign have been deployed online and throughout the campus, and can be viewed at:

<http://www.lib.montana.edu/about/msulib101>.

Nursing Education

The Caring for Our Own Program (CO-OP) aims to increase the enrollment of

American Indian and Alaska Native students in the MSU College of Nursing to build a strong pool of nurses who are prepared to serve their home community and the nursing workforce in general. In the last year, the program served 34 students through financial support and a culturally appropriate support network, including an academic advisor, tutoring, and study groups. Five American Indian nurses graduated with a BSN degree at the end of the 2017-2018 school year. Since the program began 19 years ago, approximately 90 percent of CO-OP graduates have opted to work in AI/AN communities.

Assistantships

The Sloan Indigenous Graduate Partnership (SIGP) at Montana Tech provides mentoring and financial aid to attract American Indian into STEM field studies and help them complete graduate degrees. The institution funds a research or teaching assistantship and a tuition waiver for each SIGP student. In addition, SIGP funding provides an additional \$20,000 over the duration of the master's degree program.

During the last cycle, Montana Tech admitted two new SIGP students who are working toward thesis-based master's degrees in environmental engineering and industrial hygiene. Two previous SIGP scholars have completed all degree requirements and their theses were presented last summer. SIGP alumni frequently return to their tribal communities in responsible positions.

CELEBRATING MONTANA'S NATIVE HERITAGE

Montana Indian Language Program

The Montana Indian Language Program (MILP) of the Department of Commerce is partnering with Indian Country to preserve and perpetuate the Native languages of the eight tribal nations in the state of Montana. MILP provides grants to support the tribes' efforts to develop comprehensive language resources, teaching tools, and language archives. Since the program implementation, Tribal Nations have developed various methods for preserving and disseminating their Native languages. In particular, the use of technological tools such as online applications featuring interactive games, songs, vocabulary quizzes, lesson plans, audio dictionaries, and searchable databases, has facilitated language learning for people of all ages. For example, in this grant cycle the Little Shell Chippewa Language Program is creating

CDs and DVDs of Chippewa and Ojibwe Native speakers and expanding teaching curriculum materials that will be integrated into the language mobile application. In addition, Stone Child College is producing on behalf of the Chippewa Cree Tribe audio recordings to create an advanced learner digital Cree language mobile application.

Native language revitalization programs with tribal elders and fluent speakers foster a sense of identity and belonging for Native youth and their families. On the Fort Peck Reservation, culture and language classes are offered twice per week to the tribal community. Further, tribal community colleges are academically preparing the next generation of Native language instructors, such as Chief Dull Knife College on the Northern Cheyenne Reservation where six interns will receive their Class 7 Certification through the Montana Office of Public Instruction to enable them to teach their Native language within the public school system.

Exploring the Native Ways

In October of each year, Montana Historical Society Archaeology Day hosts over 500 students to explore the museum and observe demonstrations of Native American traditions, practices, and methods, such as flint knapping, stone boiling, hide tanning, cultural storytelling, ethnobotany, tipi rings, and using an atlatl (spear-thrower). This annual event offers a unique educational experience about Montana's Native heritage, supported with pre and post lesson plans for teachers to extend classroom learning related to the event.

Montana's Native Warriors

Inspired by the popular Smithsonian "Native Words, Native Warriors" exhibit, the Montana Historical Society created the "Montana's Native Warriors" traveling exhibit that illustrates the involvement of Native Americans of Montana in World War I and II, the Korean War, the Vietnam War, and other modern conflicts. The exhibit features contemporary and historic photographs, first-hand accounts of Montana's Native American soldiers, and a panel honoring Montana's Native American veterans.

Our Children Carry On Our Ways

On June 27-29, 2018, Salish Kootenai College hosted the Montana Early Childhood Tribal Language and Indigenous Games Summit, titled "Our Children Carry On Our Ways," to celebrate Native languages and cultures and foster language immersion practices for preschool kids. Approximately 100 people attended, bringing together Head Start and early childhood providers, Native language immersion program staff, tribal college language and early childhood faculty, and Tribal Council members. This event was collaboratively developed between the Montana Head Start Collaboration Office at DPHHS, the Salish Kootenai College Early Childhood Department, and the American Indian and Alaska Native Head Start Collaboration Office.

"It was an amazing learning experience. It was enriching not only to learn more about our local cultures but from other Native cultures as well."

– Summit participant

RECOGNITION

Native Heritage Guardian

Tony Incashola of the Confederated Salish and Kootenai Tribes received the 2018 MHS Board of Trustees' Heritage Guardian Award and Heritage Keeper Award in honor of the length and breadth of his career devoted to the history and heritage of his people. Over the last 40 years, Incashola has worked to fulfill the mission of the Salish-Pend d'Oreille Culture Committee (Committee). Under his leadership, the Committee has compiled an impressive record of traditional languages, cultural practices, and tribal history through oral interviews, research, and publication. As a speaker, writer, and educator, he has played a fundamental role to bridge cultural divides and serve the common good with key partners locally, statewide, and nationally. He provides invaluable guidance year round to educators, museum staff, historians, as well as public land and cultural resources managers, to promote a better understanding of the continuing

connection between tribal people and their homelands. His dedication to the cause of tribal cultural revival and his stature has helped establish the Committee as one of the foremost tribal cultural institutions in the nation.

Native Contemporary Artist

In 2017, the Montana Arts Council selected Bently Spang, a member of the Northern Cheyenne Tribe, to receive an Artist's Innovation Award. This program rewards Montana artists who demonstrate innovation, originality, and dedication in their artwork. In 2018, Spang was also honored by the National Artist Fellowship with an award in the Artistic Innovation category. Out of his studio in Billings, Montana, Spang integrates mixed mediums and formats into singular artwork to create sculptures, videos, performances, and installations. Spang earned a master of fine arts' degree in sculpture at the University of Wisconsin, and established his career as a multi-disciplinary artist, curator, educator, and writer. His artwork is featured in museums and private collections in the U.S. and Europe. In addition, his artwork has been exhibited across the United States, and in Europe, Mexico, Canada, and South America.

"I am committed to gathering as many mediums and modes of expression as are necessary to express my experience as a contemporary Tsistsistas [Northern Cheyenne] man. I work to expand the one-dimensional definition of Native people created by Western culture and, instead, reveal my own complex, place-centered cultural experience."

—Bently Spang

EFFECTIVE GOVERNMENT

PROACTIVE SOLUTIONS

In January 2017, the Montana Department of Public Health and Human Services (DPHHS), in partnership with a Coalition of tribes and urban Indian health organizations (UIHO) across the state, published the Montana Native Youth Suicide Reduction Strategic Plan to address the suicide rate among Native youth, an initiative of Governor Bullock. Later that spring, HB 118 was passed in the 2017 Legislature which appropriated \$250,000 to DPHHS for assisting with state and tribal efforts begin implementation of the action steps of the January 2017 Montana Native Youth Suicide Reduction Plan.

The State of Montana is implementing a statewide suicide reduction plan encompassing four pillars.

During state fiscal year 2018, the MT DPHHS and the newly established Montana Native Youth Suicide Reduction Advisory Council successfully completed priority action steps, beginning with the adoption of Zero Suicide—a prevention model based on a systems approach within health and behavioral health organizations. This model was introduced across the State of Montana within tribal and urban Indian communities. This event o he Zero suicide model and setting the pace for members to be community champions for the initiative and facilitating the Zero Suicide Academy event in October 2017 in Helena, in collaboration with Suicide Prevention Resource Center , which hosted over 75 participants; . This historic event spearheaded the implementation of Zero Suicide. From these efforts, each Tribe and Urban Indian Health Center now has an established and trained group of individuals within their community health and behavioral health organizations to support and lead Zero Suicide implementation.

Building on momentum from the Academy and additional allocated funding, Advisory Council

members met in Helena, MT, in December 2017, to update the strategic plan and make recommendations to MT DPHHS on funding priorities. The department is implementing those recommendations just as we did the initial recommendations of the coalition. The Academy hosted over 75 participants, including trainees from six tribes, four UIHOs, five IHS service units and the IHS Billings Area Office, and MT DPHHS. This historic event spearheaded the implementation of Zero Suicide across the state of Montana within tribal and urban Indian communities. From these efforts, each tribe and UIHO now has an established and trained group of individuals within their community health and behavioral health organizations to support and lead Zero Suicide implementation, which was supported by task orders with the Department.

Montana's Native youth suicide deaths for ages 11 to 24 occur at a rate that is five times greater, at 42.82 per 100,000 deaths, than the statewide suicide death rate of the same age group, at 8.01 per 100,000 deaths. This plan

targets suicide reduction through the adoption of Zero Suicide, a prevention model developed to address a systems approach to suicide care within health and behavioral health organizations. Zero Suicide is one of the four pillars of the Plan.

STRENGTHENING STATE-TRIBAL RELATIONS

Tribal Leaders Summit and Reservation Tour

During the spring of 2018, Governor Bullock travelled to Indian Country to hold a series of summit meetings with the leaders of each Tribal Nation in Montana. This gesture is an affirmation of the positive state-tribal relationship and a commitment to strengthen cooperation and trust. Joined by his policy staff and state agency directors, the Governor crisscrossed the state to attend meetings at

tribal headquarters located in Box Elder, Browning, Hardin, Harlem, Great Falls, Lame Deer, Pablo and Poplar. This state-tribal consultation framework allowed state leaders to directly respond to the concerns that the tribal governments raised. These discussions FOCUSED ON priorities the tribes wish to address in the year ahead, including safety and health issues, environmental stewardship, educational and economic development endeavors, interests in state-tribal cooperative agreements, and opportunities for collaboration to help build stronger tribal communities.

Fort Belknap Signage and Maps Project

In 2017, the Department of Fish, Wildlife and Parks (FWP) began a joint venture with the Fort Belknap Fish and Wildlife program to erect signage on the sub marginal lands surrounding the Fort Belknap Reservation. The signs indicate which areas are owned by the tribe, the state, or private entities to inform hunters of the hunting land boundaries accessible to them, based on the type of hunting permit they hold and which hunting season is open. In addition, four large kiosks with maps outlining land ownership were installed in the area. Since the project implementation, both state and tribal game wardens have reported a reduction in hunting violations and less time is now required to patrol the area.

PROMOTING HEALTH

Cardiovascular Health

Since 2016, the Cardiovascular Health Program at DPHHS has worked with its communications contractor, Banik Communications, and tribal partners to launch an educational campaign that is culturally relevant for American Indians on how to accurately take a home blood pressure measurement. This project has generated several different video versions featuring an American Indian person demonstrating the use of a blood pressure cuff. The project involved collaboration with Native speakers, tribal elders, tribal colleges, tribal language and culture departments, and other partners to produce tribal language translations and strengthen tribal outreach efforts. As of last year, translations were completed in Crow, Cheyenne, Blackfeet, Cree, Salish, Assiniboine, Sioux (Dakota) and White Clay, as well as a Plains Indian sign language translation performed by Lanny Real Bird.

The tribal language translations have been compiled into DVDs that were shared with tribal health programs, Indian Health Service, Urban Indian Clinics, the Association of American Indian Physicians, and other health resources in rural and urban areas.

Healthy Nutrition

In May of 2018, the Montana State Women, Infant and Child (WIC) program worked with the Confederated Salish and Kootenai Tribes and the Chippewa Cree Tribe to collect testimonials from WIC participants about the positive impact of the program. These testimonials have been incorporated into advocacy materials and outreach efforts within tribal communities to increase awareness and encourage participation in the program. WIC delivers

supplemental nutritious food benefits, nutrition and breastfeeding education, support and referrals/care coordination for low income pregnant women, post-partum women, and infants and children up to 5 years old, which is essential for their health and wellbeing. State-tribal contracts serving each Indian reservation in Montana have funded a total of \$741,373 in services in state fiscal year 2018 and \$2,292,538 in redeemed food benefits in the previous state fiscal year.

CREATING SAFE COMMUNITIES

Victims of Crime Act (VOCA) funds from the Montana Board of Crime Control support the efforts of four tribal domestic violence centers located on the Blackfeet, Rocky Boy's, Fort Peck, and Northern Cheyenne reservations. This program funds victims' advocate staff positions that provide direct services to victims of abuse and their families, assistance through the criminal justice process as a result of victimization, and training to tribal court and law enforcement personnel. In addition, prevention strategies on the reservations are implemented through community outreach, educational activities, and awareness campaigns in an effort to bring hope, positive change, and break the cycle of violence.

ALWAYS BUCKLE UP AND INSIST OTHERS DO THE SAME

Safe On All Roads

The Safe On All Roads (SOAR) program aims to reduce the rate of highway fatalities through education and community outreach on Indian reservations in Montana. Although American Indians comprise 6.2 percent of the Montana population, they represent approximately 17 percent of the motor vehicle crash deaths in the state on average and 25 percent of the alcohol-related fatalities—the majority of them involving unbuckled victims.

During the 2017-2018 grant year, the Montana Department of Transportation (MDT) Highway Traffic Safety program awarded \$306,413 to support the development of SOAR educational campaigns, fund law enforcement efforts, and hire SOAR coordinators/advocates on each Indian reservation. This collaborative process generated the creation of a “Buckle Up” campaign based on a basketball theme that resonate within tribal cultures and communities. In addition, the funds support the efforts of the Fort Belknap law enforcement and stakeholders on the Blackfeet, Rocky Boy’s and Fort Peck

reservations who have formed the Northern Tribes DUI Task Force dedicated to reducing the occurrence of impaired and/or drug related traffic crashes in their communities.

Montana Department of Labor & Industry’s Safety & Health Bureau

The Montana Department of Labor & Industry’s Safety & Health Bureau travels the state providing OSHA 10-Hour training in both Construction and General Industry to high schools, colleges and youth organizations across the state. The Bureau provides this training on a regular basis for the Confederated Salish & Kootenai, Blackfeet, Crow and Chippewa Cree Tribes and upon request for the other tribes. In addition to learning how to identify hazards in the workplace, the OSHA 10-Hour cards also provide a boost to the resumes of students that earn them. The Bureau has also held classes outside of a school setting for tribal members for the Crow and Chippewa Cree.

In addition to the OSHA 10-Hour training, the Bureau hosts free training through SafetyFestMT events in communities across the state each year. When SafetyFestMT events are held in communities near tribal nations, the department reaches out to the local tribal government through the TERO officers and other contacts to raise awareness and encourage attendance for these free events.

In addition to training, the bureau provides free safety consultations to tribal businesses upon request. These consultations are confidential and can help the businesses reduce lost time accidents.

The Montana Department of Transportation (MDT)

The Montana Department of Transportation (MDT) continues to provide the Native American tribes with funding from the Federal Transit Administration (FTA) for transit operations and capital acquisitions. For FY 2018, Blackfeet Transit, Confederated Salish & Kootenai (CSKT), Chippewa Cree and Fort Peck Transit were awarded a total of \$1,769,169 in federal funds to be used to offset the cost of providing public transportation services on the reservations at a subsidized rate to their residents. These bus services are accessible for clients whom require special assistance, and they connect the general community to important health care, nutrition, recreational, and other services. In November 2012, the Fort Peck Tribes were approved for a loan in the amount of \$225,000 from the Montana Essential Freight Rail Loan (MEFRL) program. The MEFRL program supports the preservation, operation, and expansion of branch lines and other railroads in Montana. The primary focus of state involvement in rail planning is to assure that Montana is served by an efficient rail network integrated into a state transportation system.

The funds from the loan were used to reconnect the spur serving the Poplar industrial park by installing a switch on the west end

of the track, replacing approximately 80 feet of track, and doing other associated work.

PROTECTING WILDLIFE AND ECOSYSTEMS

Aquatic Invasive Species

The Department of Fish, Wildlife and Parks (FWP) is actively engaging tribal partners to expand early detection efforts and prevent the spread of Aquatic Invasive Species (AIS) in Montana waters. In 2017, the State established new rules that require inspection for all watercrafts entering the state and crossing the Continental Divide, ARM 12.5.706. In response to a request from the Confederated, Salish and Kootenai Tribes (CSKT), the department also established rules for mandatory inspection before launch into the Flathead Basin waters.

These new requirements provided the opportunity to partner with tribes on inspection stations at key locations. The CSKT was awarded a \$330,000 contract to operate watercraft inspection stations in Ravalli, Elmo, and Kalispell. The Blackfeet Nation received a \$210,000 contract to operate a watercraft

inspection station in Browning. FWP coordinates training, provides data collection materials, and supplies outreach materials to promote an effective and consistent AIS awareness message statewide. In addition, training and sample analysis are provided to the CSKT, Blackfeet and Fort Belknap Tribes to encourage tribal involvement with AIS monitoring in their respective area. FWP is reaching out to other Montana tribes as well to increase their awareness, interest, and involvement with AIS issues.

Chronic Wasting Disease

In November 2017, Chronic Wasting Disease (CWD) was discovered in wild mule and white-tailed deer in Carbon County. The FWP response plan called for establishing an Initial Response Area or IRA, which extended onto the Crow Reservation. FWP and Crow Tribe officials collaborated to limit the spread of the disease through trainings, public meetings, and the dissemination of educational materials in the tribal community. Tribal members received sampling kits and had the opportunity to attend training to learn the best technique to collect samples from a gland that can be tested for CWD.

Subsequently, a special hunt was conducted, followed by CWD testing, and no deer sampled from the reservation tested positive.

In the end, the tribe gained valuable information and technical expertise in CWD, and FWP obtained the necessary samples and information to complete its necessary research.

Urban & Community Forestry (UCF) program

The Urban & Community Forestry (UCF) program continues to expand and strengthen our work and relationships with our tribal partners. After receiving a small amount of Forest Service funds (\$44,000) in 2016-2017 to work through

tribal colleges and organizations, we've since acquired additional funds; the program successfully applied for a 2018 Landscape Scale Restoration grant through the Forest Service to enhance community forestry with tribal communities and schools (\$185,000). This grant will bring projects to reality for several reservation communities and populations across the state.

Including:

- Project work with Polson Schools (CS&KT) creating interpretive learning space of native trees, shrubs, edible plants, educational presentations, summer sessions.
- Multi-agency partnership of week-long arbor day celebrations with several schools and communities in the Crow Reservation.
- Planting legacy apple trees of historical significance, cuttings from trees planted by Chief Plenty Coups at the state park.
- Involvement with the Indian Education for All program, presenting and attending conference, pursuing development of educational curriculum to bring culture and tree science together into a series of lessons.
- Tree plantings with on campus with Blackfeet Community College (Blackfeet), designing multifunctional shelterbelt that incorporates medicinal, ceremonial, herbal and edible vegetation

The Little Bighorn River Restoration Project

The Little Bighorn River Restoration Project brought in a \$300,000 reclamation and development grant, awarded to the Crow Tribe in 2013 to restore a portion of the Little Big Horn River. The project was delayed pending funding from the Federal Emergency Management Act program and will finish up by December 2018. The project's scope is to stabilize the bank slope, expand the floodplain, and construct two overland flow crossings.

The overall goals of the Little Bighorn River Restoration Project include mitigating risk to property and life caused by flooding; protecting, enhancing and creating stream, riparian, and wetland habitat; improving water quality; and, creating a community resource.

Absaloka Mine Reclamation

The Absaloka Mine, operated by Westmoreland Resources, Inc. has two mine permits. One for state and Crow coal located adjacent to the northern boundary of the Crow Indian Reservation boundary and one for Crow coal located south of the boundary, within the Crow Indian Reservation. The Coal Section participates in quarterly meetings that include representatives from the Crow Tribe, Office of Surface Mining Reclamation and Enforcement (OSMRE), Bureau of Land Management, Bureau of Indian Affairs, Westmoreland Resources, Inc. (WRI), and Department of Environmental Quality (DEQ). Additionally, monthly inspections of the mine area are conducted jointly with Crow tribal members, OSMRE, WRI, and DEQ representatives. To assist the Crow in development of their regulatory program, the Coal Section has offered opportunities for the Crow to accompany DEQ inspectors during discipline specific (particularly soils and vegetation) and bond release inspections at other coal mines in the state.

Clark Fork River Remediation

The Montana Department of Environmental Quality's Remediation Division is currently implementing Remedial Action under the Comprehensive Environmental Response, Compensation and Liability Act (superfund) for the Clark Fork River Operable Unit (the Clark Fork River floodplain from the Warm Springs Ponds near Anaconda downstream to the former Milltown Reservoir, near Missoula). For Remedial Design and Remedial Action, DEQ coordinates with the Confederated Salish and Kootenai Tribes, which may have certain Tribal Cultural Resources in areas being addressed within the cleanup project boundaries. This coordination includes consideration of information and comments provided by the Tribes, the Tribes' participation in the remedial design work group, a standing invitation to attend construction meetings discussing ongoing and upcoming construction activities, and specific processes for observing historic preservation requirements and protecting and mitigating impacts to previously unknown Tribal Cultural Resources discovered during construction activities. This Coordination is consistent with an agreement between the Tribes and the United States Environmental Protection Agency entitled "Addendum Agreement Regarding Implementation of the National Historic Preservation Act at the Clark Fork River Basin Comprehensive Environmental Response, Compensation and Liability Act Superfund Sites between the United States Environmental Protection Agency, the Confederated Salish and Kootenai Tribes and the

Advisory Council on Historic Preservation” (July 2003). This coordination process has been ongoing since the start of Remedial Action in this Operable Unit approximately seven years ago and will continue through the end of the project approximately two decades from now.

Improving Water Quality in the Tongue River

The Montana Department of Environmental Quality (DEQ) is consulting with the Northern Cheyenne Tribe to collaboratively develop solutions for improving water quality in the Tongue River, as the river passes through both the Northern Cheyenne Reservation and the state of Montana. The river is not meeting Montana’s water quality standards for salinity; therefore, as required by state law, DEQ is developing total maximum daily loads (TMDL) for the Tongue River. The TMDL will determine the maximum amount of salt the Tongue River can receive/contain daily and still meet Montana’s salinity water quality standards, as well as allocations of the allowable load for

the major contributing sources of salt to the river.

Since 2014, DEQ has met with representatives of the Northern Cheyenne Tribe’s Department of Environmental Protection and Natural Resources approximately twice a year to ensure tribal concerns are being addressed, and to discuss potential solutions for reducing salt loading to the Tongue River. DEQ is also working with various local Tongue River water users and land managers in developing these solutions, as well as the local counties, conservation districts, industrial entities, Montana Department of Natural Resources and Conservation, Montana Fish, Wildlife and Parks, U.S. Forest Service, Federal Bureau of Land Management, and the State of Wyoming, as the Tongue River originates in the Big Horn Mountains in Wyoming. This project is expected to continue through 2027 and result in improved water quality in the Tongue River.
